## Work Experience

### Engineering Manager

June 2026 - Present

**Etegent Technologies Ltd.** – Dayton, OH

- Technical lead for multiple contracts with cumulative budgets of over \$2M/year.
- Prepares and presents customer status reports and labor forecasts.
- Manages a team of 8+ software engineers, providing support via frequent code reviews as well as performance reviews and career goal planning.

### Research Engineer III

July 2025 – June 2026

**Etegent Technologies Ltd.** – Cincinnati, OH

- Principal developer of an interactive web application for an aerodynamics modeling tool using a Python (FastAPI) backend and React + three.js frontend.
- Works with several small development teams to deliver new features to a variety of other Python and React projects, as dictated by customer needs.
- Supervised and mentored a small team of software engineers.

### Research Engineer II

September 2020 – July 2025

**Etegent Technologies Ltd.** – Cincinnati, OH

- Led the full-stack development of a geospatial data analysis web application, written using a C#/.NET6 + PostgreSQL backend and Angular frontend.
- Designed an extensible plugin-based system to load a variety of geospatial data formats (e.g, KML, ESRI Shapefile, GeoJSON, GML, CSV) into a common format.
- Created a PyQt6 application for plotting and correcting OPIR track data.
- Created robust GitLab CI/CD pipelines, including reusable templates, for 10+ projects to automate testing, deployment, and other routine tasks.

### Junior Engineer

August 2017 - August 2020

**Etegent Technologies Ltd.** – Cincinnati, OH

- Significantly contributed to the development of a complex MATLAB-based geospatial data visualization GUI and to its modernization as a full-stack web app.

---

## Education

**Bachelor of Science | Computer Science** | *University of Cincinnati*

May 2021

---

## Technical Skills

**Web:** TypeScript, React, Angular, Material UI, Bootstrap, CesiumJS, three.js

**Python:** PyQt6, FastAPI, NumPy, Pandas, Plotly, SQLAlchemy, pylint, pytest

**Other:** GitLab CI/CD, PostgreSQL, Docker, C# (EF Core, SignalR), MATLAB, Bash
